Simulation configuration parameters and primary mechanics.

Config	N	BAC_i	D_i	s_i	M_i	**Primary mechanic**
TC-10SF-R	1	100	0	0	1	Isolated atom: single action, single milestone
TC-1LMAIF-R	1	100	3	2	3	Delayed start, progress-triggered advance, high recovery
TC-10MAIF-R	1	100	3	0	3	Diminishing efficiency, termination risk
TC-3XMAIF-R	3	100/200/300	3	0/6/7	3	Multi-project, gap then overlap, interacting cash flows

Trigger parameters and expanded mechanic description.

Config	ϕ_i	ψ_i^{trig}	**Mechanic summary**	**Key behaviour**
TC-10SF-R	0.00	—	Single action, single milestone	No efficiency loss; baseline reference case
TC-1LMAIF-R	0.20	0.80	Delayed start; progress-triggered advance	High recovery potential; milestone at 80% progress
TC-10MAIF-R	0.20	0.00	Diminishing efficiency; termination risk	Penalty accrues continuously; no trigger threshold
TC-3XMAIF-R	0.20	0.00	Multi-project; gap then overlap	Interacting cash flows; staggered schedule
